ABOUT US

Mediterranean Building Materials (MBM) was first founded in Abu Dhabi in 1992 and with the dedication of the company founder and the entire MBM team has become a regional leader in the production, supply and installation of specialized construction products.

Over the years, we have expanded our operations to cover the Middle East by opening offices in Dubai, Manama, Doha, Muscat and Beirut. We are proud to be associated with major governmental, commercial, healthcare, educational and hospitality developments in the region.

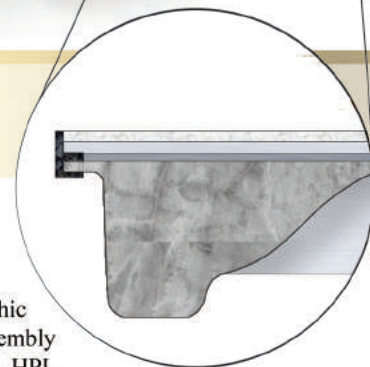

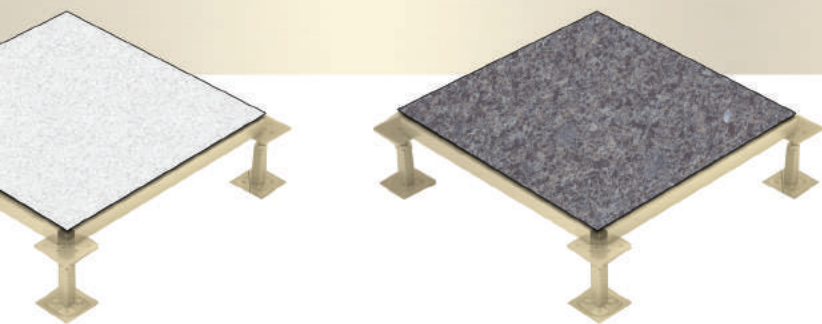

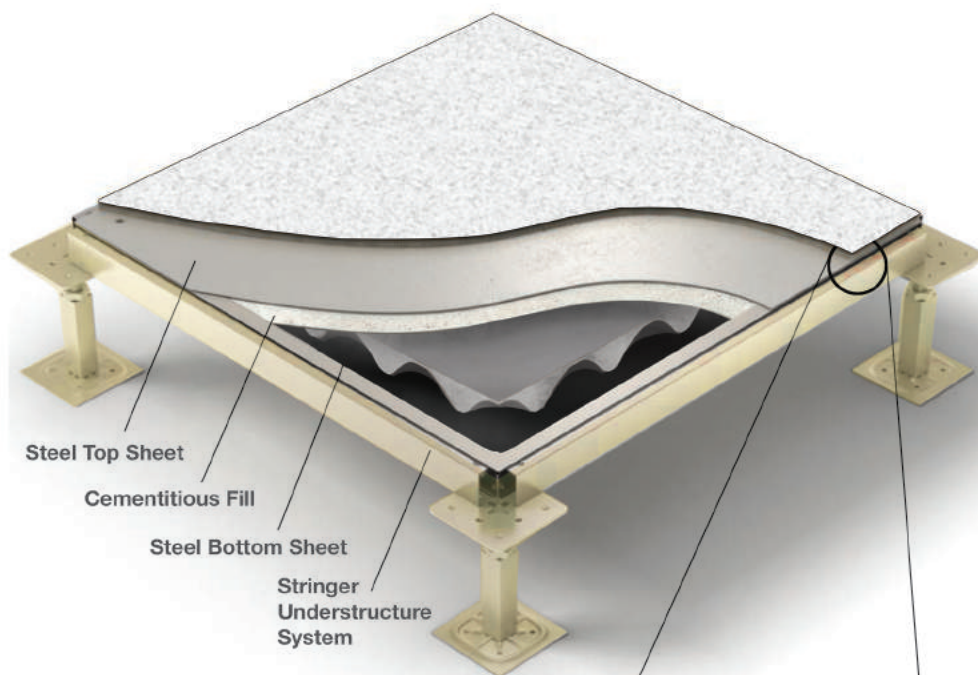

Raised access flooring has always been one of MBM's specialties, successfully completing multiple projects over the region in the course of the past 25 years with regards to calcium sulfate and wood chip materials. After careful analysis of the market demands and multiple tests completed, we are proud to announce the launching of our own line of cementitious raised access flooring MEDFLOOR.

CEMENTITIOUS INFILL ACCESS FLOOR SYSTEM

CHARACTERISTICS

Each tile is composed of a bed of cement bonded to a ST14 steel plate in order to create a structurally strong ribbed platform

The system is multifunctional, anti-static, dust-proof, anti-rust and relatively anti-corrosive. Medfloors is a high performance and an excellent solution for under-floor IT rooms, data centers, communication centers, laboratories, office spaces and a large variety of applications.
