

Stobigym®

Indoor Flooring for
Sports and Leisure

STOCKMEIER
URETHANES

Stobigym® flooring systems are suitable for use in indoor sports facilities and various multi-purpose surfaces. From point elasticity to area elasticity – the customized design meets the highest performance standards for DIN, EN, and IHF for schools, churches, health care facilities, and recreational centers. Our Stobigym® systems are available in various thicknesses and based on a variety of different base layer construction systems.

System Benefits

Point Elastic Properties

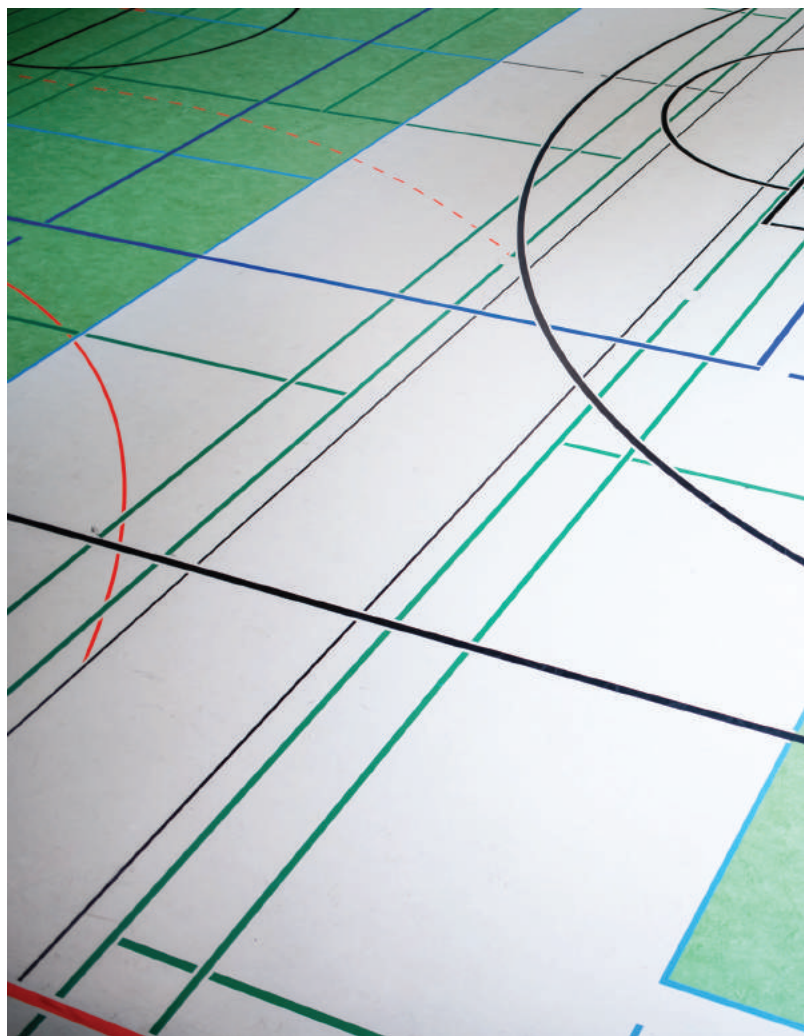

Preferred for child and youth game areas.

Combined Elastic Properties

Suitable for a broad range of games, particularly those involving a high degree of jumping, such as handball, volleyball, or badminton.

Area Elastic Properties

Flexible application opportunities and suitable for sports such as basketball, dancing, and wheelchair sports.
